

At the Heart of Industry

Brimar is a privately owned, Queensland-based electrical contracting company that services industrial operations across the manufacturing, resources, infrastructure and marine sectors.

With the highest regard for electrical safety and quality, Brimar delivers value to its customers by working to find solutions that are practical, innovative and cost-effective to improve productivity as well as reduce costs.

Discover the Brimar Difference

Our Capabilities

Brimar's professional and reliable contracting solutions span a broad range of electrical, power and technology-based services. These services include specialist installations, fully integrated automation and control systems, and service and maintenance programs – right through to large-scale design and construct projects.

Our Team

Brimar's strength lies in our experienced technical team and qualified support staff.

Equipped with the latest apparatus, tools and testing equipment, Brimar's team delivers quality outcomes across all types of electrical, data and telecommunications technologies.

Our Resources

Brimar works hard to continuously deliver the highest levels of client satisfaction, safety and quality service – 24/7.

Brimar maintains a fleet of services vehicles and a specialist marine craft for our dedicated Port Services. Our investment in state-of-the-art software, systems and processes guarantees efficiency, transparency and integrity in everything we do.

We are certified to the following standards

- Environmental – ISO 14001:2013
- Quality Management Systems – ISO 9001:2013

Our Safety Standard

We uphold the highest standards of workplace safety and are certified to OHS – ISO 4801 and OHS JAS ANZ 2013.

Hazardous Working

Brimar understands that our clients in oil and gas, fuel handling and storage processing industries require an advanced, more specialised level of service expertise. Hazardous Area Certification is an essential qualification Brimar provides customers to heighten OHS deliverables for hazardous working environments.

24hr Breakdown Service

Brimar understands that breakdowns don't just happen between the hours of 9am and 5pm, Monday to Friday. That is why we offer our customers a prompt and competent 24-hour breakdown service, 7 days a week, 365 days a year; an integral part of our Customer Support Agreements.

Servicing Industry

Brimar specialises in helping companies of all sizes improve their overall service capabilities and efficiencies by providing industrial electrical solutions that:

- Reduce energy costs
- Lower maintenance expenses
- Decrease environmental footprints
- And, improve the quality and supply of electricity to keep businesses operational

Brimar's client base and service offering spans many industries sectors and includes

Manufacturing:

- Chemical
- Building products
- Large-scale food production plants
- Concrete and quarry

Infrastructure:

- Wastewater
- Water supply and treatment plants
- Public spaces

Resources:

- Energy service providers
- Oil and Gas
- Construction

Marine:

- Ports services
- Marine bulk material handling and shipping

Our Services

Brimar provides a comprehensive portfolio of end-to-end electrical solutions tailored to meet the specific needs of individual customers.

Our service offering includes turnkey solutions from design and construct, electrical fit out, project management and ongoing service and maintenance. Additionally, Brimar can also offer the provision of automation technology, instrumentation, communication, power and data reticulation, street lighting and, energy management.

We support our clients to achieve excellence through service and technological change.

Our specialist services include;

- Service and Maintenance
- Project Management
- Instrumentation
- Data & Communications
- Engineering Design
- Hazardous Area Working
- Energex accredited Underground Residential Development (URD)

Our clients trust us with their highly specialised contracts. Brimar's strategic support services, technical capability and scalability make us one of Queensland's leading, mid-sized Industrial Electrical Contractors.

Our Five Key Service Channels

Our broad range of electrical service capabilities are split across our five key service channels

Service and Maintenance – from individual call outs, to full-site facilities management solutions, we provide a tailored program to suit your operational and financial needs.

Projects – our experience, project management capabilities and approach, ensure your project stays within scope, on time and on budget.

Technology – we operate at the forefront of technology for the electrical solutions needed in today's industrial sector. We develop, integrate, install, commission and test any end-to-end system.

Power – we have a strong heritage of performing large scale high-voltage electrical works, power distribution and conversion systems.

Port Services – we have been delivering complete end-to-end contracted, multi-disciplined services, facilities management, consultancy and engineering solutions for Port services, since 2003.

As a multi-discipline service provider, we are also able to provide integrated service support on projects across a range of facilities and resource management.

Our Customer Support Agreements

From individual call outs, full-site facilities management solutions, or electrical, mechanical, automation and systems integration needs, at Brimar, our service and maintenance programs are centred on a CSA (Customer Support Agreement).

To achieve best practice, optimum performance and longevity of your operational assets, we work in partnership to ensure your equipment, its maintenance and evolving technological requirements are met in a timely and planned fashion.

We are flexible in our approach. Our CSA framework is tailored to each individual customer's technical, operational and financial needs to accommodate a combination of / or a:

- Maintenance Advantage
- Service and Maintenance Pro
- Critical Spares +
- Component Cost Cap
- Tech Flex

Our qualified electrical technicians will ensure you achieve maximum return for investment both in Brimar and your electrical infrastructure. We will work to support

- Improved system maintenance planning, tracking and cost control
- Electrical and environmental compliance
- Safe working environments
- Reduced operating costs by avoiding unplanned downtime in production
- Minimise repair time when the unforeseen occurs
- Parts supply – Genuine parts and re-manufactured components, all backed by replacement warranty
